Whistler 360 Health is a not for profit, community-governed primary care clinic where health care professionals provide patient-focused, accessible, longitudinal care. The model is attractive for primary care providers as it enables them to focus on patient care instead of administration.

We have two locations – Our Lorimer Road clinic is located on the 2nd floor of the Whistler Health Care Centre with medical imaging and lab services on site. Our satellite clinic is also centrally located in the Village of Whistler on Main Street.

We have 9 MD's, 3 NP's and 15 visiting specialists that include neurology, dermatology, internal medicine, rheumatology, endocrinology, urology, pediatrics and podiatry. We also have a visiting general surgeon and interventional radiologist.

Whistler 360 Health is building a team. Come and work with us.

Why you should:

- Team-based care
- Professionally managed
- Administrative support
- Financial efficiencies
- Learning opportunities
- Patient and community focus
- Work-life balance
- Make a difference
- Find the joy in work
- Amazing community and recreation opportunities
